LAKE COUNTY GENERAL HEALTH DISTRICT

CHILD SAFETY SEAT PROGRAM WILL BE OFFERED THROUGH LAKE HEALTH

As of June 1, 2016, the Lake County General Health District transferred the Child Safety Seat Program to the Lake Health Family Birthing Center. Lake Health will now offer low-cost car safety seats to those who are in need. "Through the aftermath of the fire in August of 2015 and our recent financial struggles, this program will need to be transferred to another partner in Lake County," said Kathy Milo, Director of Community Health Services. "We have always had a very good relationship with Lake Health and they are a perfect fit to continue this program." The Lake County General Health District will work with the Family Birthing Center to ensure a smooth transition. Please contact Lake Health's Best of Health Line at 800-454-9800 or 440-953-6000 to register for an educational class and receive a low-cost child safety seat.
